

README EasyQuizEditor (ver1.0)

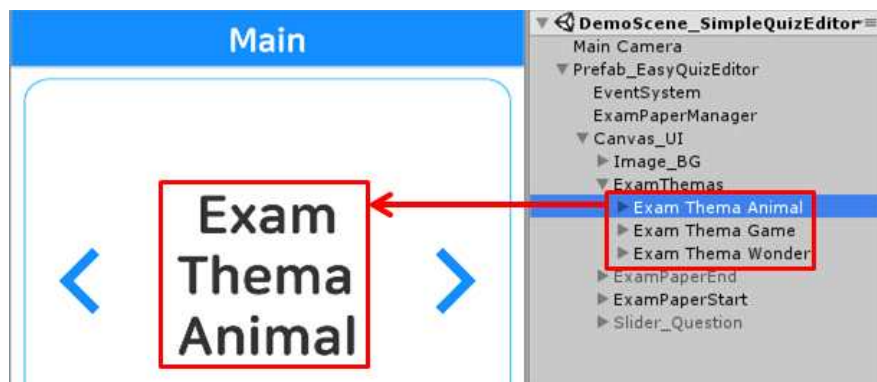

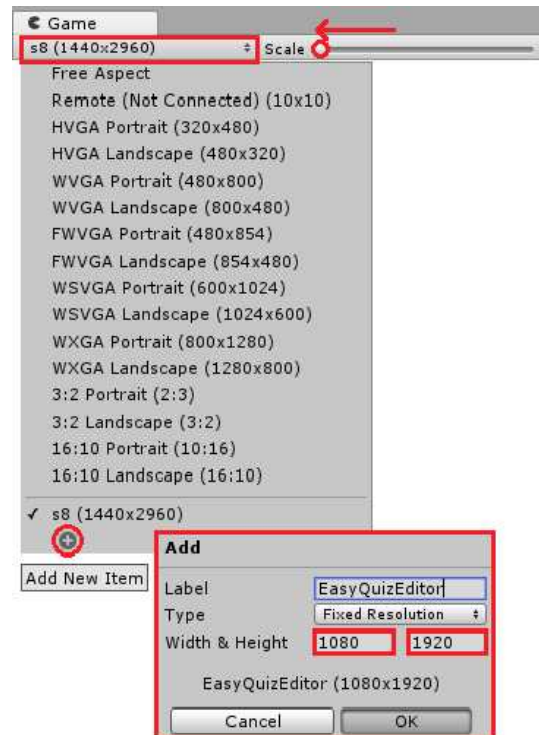

*Note

1. Match the resolution of the Game Tab to the vertical screen of the mobile phone such as 1080x1920 and 1440x2960.
2. The 'QuestionEditor' script must be located in the 'Edit' folder. Please also keep the path and name of the 'Editor' folder.
3. Please refer to the '[LICENSE] NanumFont' file for licensing used fonts.
4. Please refer to the '[LICENSE] Sounds' file for the licensing used sounds

*How to Use

1. EasyQuizEditor User's Guide

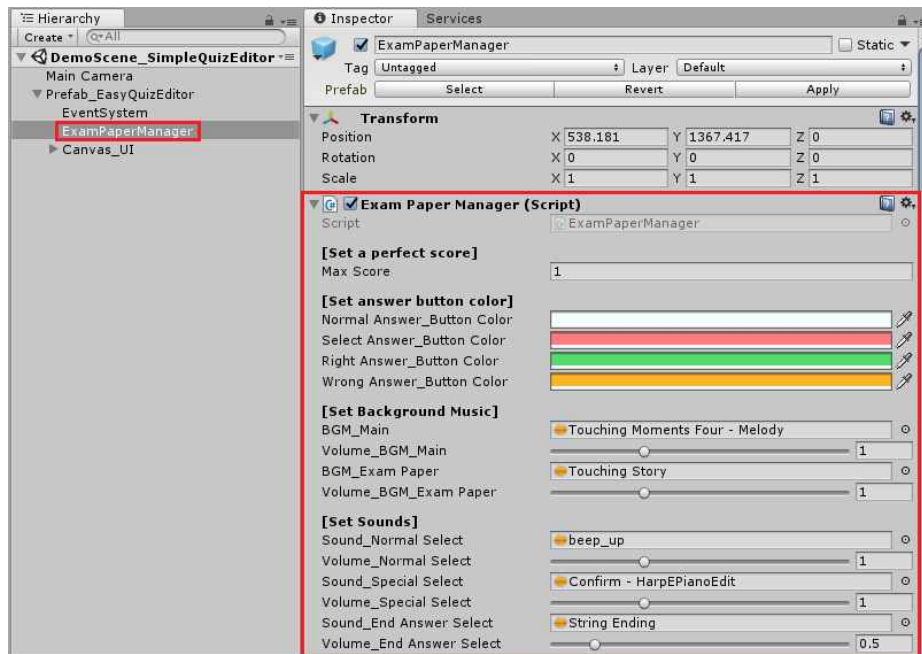

After setting the resolution of 1080x1920 in the Game Tab, open the 'DemoScene_SimpleQuizEditor' scene file or bring in the 'Prefab_EasyQuizEditor' file. You can change the overall settings of the quiz using the ExamPaperManager script that is attached to the Prefab_EasyQuizEditor/ExamPaperManager object in the path to the Hierarchy window.

In the main window, the title of Quiz can be set to the object name.

〈The following two pages detail how to set up the Easy Quiz Editor.〉

2. 'ExamPaperManager' Script Description

2-1 **Max Score**: Set the maximum score of the quiz (please enter a number greater than +10)

2-2 **Normal Answer_Button Color**: Set the color of the Answer button before selecting.

2-3 **Answer_Select Button Color**: Set the color of the Answer button after selecting.

2-4 **Right Answer_Button Color**: After you complete the quiz, the selected Answer button is set to its color if it is 'Right Answer'.

2-5 **Wrong Answer_Button Color**: After you complete the quiz, the selected Answer button is set to its color if it is 'Wrong Answer'.

2-7 **BGM_Main**: Sets the BGM playing in the first main menu window.

2-8 **BGM_Exam Paper**: Sets the BGM that plays when you solve a quiz.

2-9 **Sound_Normal Select**: Sets the sound that is played when you press the normal Answer button.

2-10 **Sound_Special Select**: Sets the sound effect that is played when a special button (start, reset, etc.) is pressed.

2-11 **Sound_End Answer Select**: Sets the sound played at the completion of the quiz.

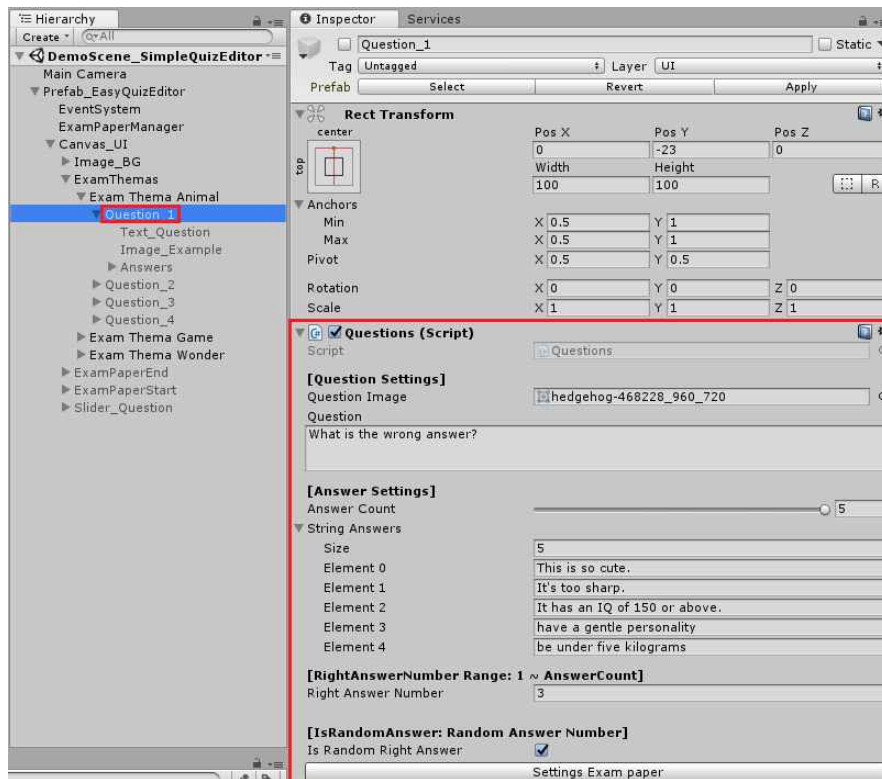

2-12 **Volume_Setting** sets the volume of the corresponding AudioClip.

3. Simply edit quiz.

The 'Questions' script, attached to the Prefab_EasyQuizEditor/Canvas_UI/ExamThemas/Exam Theme/Question_1 object, is simple to edit. After editing, press '**Settings Exam Paper (Button)**' to apply it.

4. 'Questions' Script Description

The script generates one quiz. So if you're adding more quizzes, copy the 'Question_1' object.

4-1 Question Image: Add an image to the quiz if necessary. Set to None if not required.

(To change the size or location of the image, click the Question_1/Image_Example object to change it.)

4-2 Question: Set the title of the quiz. (Please adjust 'Question image' if title is long.)

4-3 Answer Count: Sets the maximum number of answers. (You can set a minimum of 2 to 5.)

4-4 String Answer: Set the contents of each answer.

4-5 Right Answer: Set the corresponding answer sheet to the 'right answer' answer sheet.

(You can set from 1 to 5.)

4-6 Is Random Right Answer: Decide whether to randomly arrange your answers. Check to randomly arrange.

4-7 Settings Exam Paper (Button): Apply all of the above at once. If any of the above changes are made, please press this button.
